Aqvarivm

Aqvarivm is one of the storage tents, alongside such tents as the technical tent, **lvdorvm**, and **celarivm**. It is used for storing supplies of drinking water and oil used for lamps. Every legionary has access to this tent in order to obtain the resources mentioned above.

The person responsible for its functioning is the *frvmentarivs*, who serves as the manager in matters of provisioning and resource management.

NOTE! (I forgot how to add those red rectangles) Every legionary is responsible for maintaining order in the **aqvarivm,** rubbish should be properly stored and disposed of. Any violation of the rules will be severely punished.
